For the fourth time in a row, EcoVadis has awarded Klüber Lubrication the gold medal. After 2022, 2023 and 2024, we have again received a flawless sustainability certificate from the leading rating agency in 2025. With 79 points, Klüber Lubrication has achieved one of the best results and is thus among the top three percent of the more than 150,000 companies evaluated.

„After tougher competition than ever, this award is a truly special recognition“, says our Sustainability Manager Markus M.J. Hermann. „In an environment

of rising demands and increasing competition, Klüber Lubrication has not only maintained its leading position but has further improved. I am very happy about the high commitment for sustainability of our top management and of our teams worldwide.“

We would like to express our very special thanks to our entire team and all our partners who have contributed to this sustainable progress.
